

Call for Papers

Networking and Collaboration for People with Special Needs

Special Track held in conjunction with [INCoS 2010](#)
International Conference on Intelligent Networking and Collaborative Systems
Thessaloniki, Greece, 24-26/11/2010

Motivation

Networking and Collaboration applications and services bring radical changes to the everyday life of *all* citizens. At the same time, they provide an unprecedented opportunity for people with special needs to have *equal* access to the knowledge-based society and economy, since they can easily have access to interpersonal communication, education, work, commerce, entertainment, etc. The special track aims to investigate recent research and developments efforts which can empower people with special needs to fully exploit the benefits of these new technologies.

Topics of Interest

Indicative topics include (but are not limited to):

- universal design
- eInclusion
- web accessibility
- assistive technologies
- mobile applications for PSN
- collaborative applications for PSN
- orientation applications for PSN
- eLearning applications for PSN
